

Advancing Qatar's Education Vision with Scale's AI Expertise

Transforming teaching through sovereign AI
technology aligned with Qatar National Vision 2030

Disclaimer: In developing this proposal, I have necessarily relied on a number of working assumptions—for example, the precise scope and depth of planned product features (e.g., Arabic-first UI, AI Lesson Composer, Live Sovereignty Dashboard) and indicative market statistics such as the total addressable market for public-sector teacher licenses in Qatar. Where hard data were unavailable, I have drawn on industry benchmarks, government reports, and analogous EdTech deployments to create realistic yet still provisional figures. All projections, timelines, and conversion rates should therefore be viewed as directional only and are subject to validation through further discovery with Scale AI stakeholders, the Ministry of Education and Higher Education, and other Qatari authorities.

Below is a list of abbreviations used throughout the presentation for quick reference.

QNV 2030: Qatar National Vision 2030

NDS-3: Third National Development Strategy

MoEHE: Qatar’s Ministry of Education and Higher Education

MCIT: Qatar’s Ministry of Communications and Information Technology

QIW: Qatar Innovation Week

PPP: Public-Private Partnership

MSA: Modern Standard Arabic

GCC: Gulf Cooperation Council

Igniting Qatar's Flame of Learning with AI

Our vision: “Muallim” (meaning teacher in Arabic), the AI-powered teacher assistant helps educators to thrive and deliver world-class education, directly supporting Qatar National Vision 2030's knowledge-based economy with local skilled workforce.

Fully aligned with MoEHE Strategy 2024-30 that identifies **Digital Transformation** and **Professional Excellence** as flagship programmes driving educational innovation; and with the Third National Development Strategy that places quality education and digital up-skilling at the core of human-development targets.

Meet Fatima: A Teacher's Journey

Fatima, a Grade 5 mathematics teacher in Al Wakrah, spent last night hand-grading 120 quizzes while preparing bilingual lesson plans for tomorrow's STEM class.

With national targets demanding increased STEM uptake and digital skills integration, she faces unprecedented expectations balancing quality instruction with administrative demands.

Muallim, Scale's AI teacher assistant transforms Fatima's experience: she reclaims 10 hours weekly, her class average performance climbs 15%, and students engage in AI programming clubs. Fatima is proud of this progress and being a teacher seeing her pupils grow.

Fatima's story is not unique. We can empower thousands of teachers realizing the knowledge economy envisaged in Qatar 2030 and beyond.

Introducing Muallim, Scale's AI-powered Teacher Assistant

For Qatar's Ministry of Education and every public-school teacher working to inspire the next generation of bilingual, digitally skilled learners, Muallim is more than an AI assistant — it's a trusted teaching companion, built in Qatar, for Qatar.

Co-trained with local educators on in-country STEM and language data, Muallim lifts the admin burden, accelerates lesson planning, and creates engaging, adaptive Arabic-English content — all in seconds.

Unlike generic EdTech tools, Muallim is sovereign-hosted, culturally aligned, and fully compliant with Qatari data and AI ethics standards. Designed to enhance — not replace — teachers, it brings national goals to life in every classroom.

Value Pillar 1: More Teaching, Less Administration

Supporting MoEHE Strategy 2024-30 goal to "raise instructional quality" by freeing teachers from administrative burden.

Auto-Grade: Free up teachers' time to do what matters most — teach.

Automatically marks assignments and gives instant feedback — saving over 3 hours per week per teacher. That's more time spent coaching students and nurturing their potential. Empowering educators is key to MoEHE's goal of raising instructional quality.

Progress Dashboard: Turn classroom data into action, not admin.

Real-time, auto-generated success criteria for every learner — no spreadsheets, no manual tracking. Helps teachers focus on learning outcomes, supporting data-driven instruction in line with NDS-3 human development priorities.

Reporting: Strengthen the school-home partnership in both Arabic and English.

Effortlessly generate bilingual reports and SMS summaries, enhancing trust and communication with families. Promotes parental engagement and reflects QNV 2030's vision of cohesive, informed communities.

Value Pillar 2: Personalized, Bilingual Learning

AI Lesson Composer: Every teacher's co-pilot for inclusive, engaging lessons.

Simply upload the syllabus and class profile — the assistant generates scaffolded, inclusive lesson plans tailored to each student's needs. Thanks to the personalised pathways, it boosts classroom engagement and supports differentiated instruction for all learners.

Arabic-First Engine: Where global skills meet local identity.

Our assistant generates tasks in Modern Standard Arabic or Gulf dialect, embedding Islamic heritage and Arab values. It nurtures both academic growth and cultural confidence — a foundation for national pride.

Coding & Math Coach: Inspire the next generation of Qatari innovators.

Arabic and English personalised STEM guidance, helps students master difficult concepts. By sparking curiosity and making STEM subjects engaging and enjoyable, the AI coach fosters deeper learning and sustained interest. It's not just tutoring — it's building Qatar's future talent pipeline for a thriving knowledge economy.

Value Pillar 3: Sovereign, Trusted AI

Data Sovereignty: Qatari data stays in Qatar — always.

Runs on an in-country LLM cluster hosted on MCIT-approved, ISO 27001-certified cloud. Your data never crosses borders, fully aligned with NDS-3 secure citizen services and national privacy standards.

Cultural Alignment: Built with Qatari educators, for Qatari classrooms.

Using reinforcement learning with human feedback (RLHF) from local teachers and culturally tuned content filters, our assistant guarantees respectful, appropriate, and locally relevant outputs — preserving the values of QNV 2030.

Radical Transparency: Trust built into every line of code.

Live service-level and privacy dashboards ensure clear oversight and public accountability. No black boxes — just a transparent, ethical system aligned with MoEHE's governance and accountability strategy.

Governance & Compliance: Ethical AI, by design and by default.

Compliant with with the Qatari Personal Data Privacy Law, and the MoTC AI Ethics Guidelines. Continuous third-party audits, explainable AI mechanisms, and a human-in-the-loop QA model ensure accountability and transparency.

Qatar's Digital Co-Teacher

"Addressing challenges with teacher well-being, burnout & retention, Muallim isn't just about smarter lessons. It's Qatar's digital co-teacher—lightening the load so educators thrive, stay and inspire the generation that will deliver National Vision 2030 and beyond."

52% → 18% → 0

Teacher Burnout

Current high emotional exhaustion rate in Qatar's primary schools

Burnout Reduction

Projected decrease with AI assistant implementation

Resignations

Target retention rate in pilot schools

Launch Timeline & Milestones

Primary Channel Strategy

Government Relations & Field Marketing

Cabinet round-tables and policy memo drops to establish credibility and open doors at ministry level.

Thought Leadership

White papers, press interviews, and earned media positioning Scale AI as the trusted AI education expert.

Digital Channel

Always-on hub with microsites and landing pages, LinkedIn lead-gen ads, and email nurture campaigns for continuous engagement.

Events & Community

QIW booth, partner network, and hackathons creating see-it-to-believe-it experiences for stakeholders and prospective users.

Success Metrics & KPIs

40%

Share of Voice

Dominate Qatar's tech and education press within the first month of launch.

1M

Digital Reach

Achieve 1 million unique impressions across the MoEHE portal, LinkedIn, and X within 30 days.

>3%

Email Click-Through Rate (CTR)

Surpass the GCC B2G benchmark by delivering highly relevant, compelling content.

105

Sales Qualified Leads

Generate 300 MQLs and convert 35% into SQLs within the first 30 days.

<120 days

Average Sales Cycle

Meet B2G benchmarks by proactively identifying and navigating bureaucratic blockers.

<60%

Win/Competing Bid rate

Secure wins on over 40% of total bids submitted, reflecting a strong conversion strategy.

3

Ministry Opportunities

Generate 3 qualified opportunities within 90 days, including MoEHE and adjacent agencies.

25M

Year-1 ACV

QAR-contracted value covering 50,000 teacher licenses plus associated support services.

>70%

Teacher usage

Achieve weekly active usage per license, indicating product stickiness and habitual use.

>85%

Customer Satisfaction Score

Measured after key teacher interactions to monitor sentiment and user satisfaction.

>60

Net Promoter Score

High satisfaction after 1 year of use, driving referrals and renewal likelihood.

>90%

Renewal Rate

Secure annual contract renewals based on usage and impact KPIs.

Sales Enablement Arsenal

- 1. Enablement portal** – Central hub for all assets, searchable in both Arabic and English.
- 2. 90-minute rep training** – Role-play a majlis-style call using the enablement kit and wasta map flow.
- 3. Quarterly content refresh** – Update the PPP pack and roadmap scroll regularly to keep materials fresh and relevant.

1 Policy Alignment Solution Sheet

A two-pager mapping the Teacher Assistant AI to QNV 2030, NDS-3, and MoEHE KPIs — delivered in both Arabic and English ahead of key roundtables.

2 Demo Script & Click-through Prototype

Compelling, value-driven storytelling through live demos and an interactive prototype on the landing page — builds trust and sparks interest.

3 FAQ sheet & Objection Handling

Prepares sales reps to address common concerns: data sovereignty, change management, language accuracy, and fears of teacher displacement.

4 Sovereignty Assurance Bundle

Includes a one-pager on local hosting, live SLA dashboard link, and third-party audit letter — proactively addressing compliance early in the sales cycle.

5 Dual-Language Decision Dossier

A coil-bound booklet: English on the left, Arabic on the right — ensures linguistic parity. Includes vision fit, product value, security FAQs, and space for notes — accelerates internal buy-in and circulation among decision-makers.

6 Teacher Time-Saved ROI Calculator

Excel and web-based tool preloaded with Qatari teacher salary bands. Automatically calculates payback period and STEM-hours gained — turns value into hard numbers.

7 Quote-Bank & Press-Release Builder

CMS page with pre-approved Arabic/English soundbites from Scale, MoEHE, and pilot teachers — ensures every public statement stays aligned and easily referenced by sales.

8 Five-Year Road-map Scroll

Printed on heavy parchment with Arabic headings, outlining co-innovation milestones through 2030. Signals long-term commitment and respects gifting etiquette — non-luxurious and culturally appropriate.

9 Stakeholder Wasta Map

Pre-formatted Miro template to help AEs map personal networks (sponsors, influencers, gatekeepers) after each discovery call — aligns with relationship-first business culture.

Our Co-Creation Vision

Co-creating the future of Qatari classrooms—side-by-side, year after year.

Joint Governance – Al Shura Majlis

Quarterly, culturally-authentic strategy sessions ensure every roadmap decision is made “with Qatar, not just for Qatar”.

Talent Uplift – Digital Teacher Residency

12-week paid secondment turns 20 public-school teachers a year into AI curriculum co-designers and certified platform advisers.

Invest & Innovate – Five-Year Co-innovation Fund

QAR 5 million committed to Arabic STEM data-sets and local R&D, co-owned with Qatar University.

Sustainable Delivery – PPP Blueprint

We align the rollout with Qatar’s 2020 PPP Law, sharing risk, cost and upside through a transparent, multi-year contract model.

Appendix

Thought Leadership & Events

Content Strategy

- Co-authored white paper "Sovereign GenAI in K-12 Education" with MCIT
- Exclusive Al Jazeera Tech and Gulf Times interviews
- CEO op-ed in Doha News: "Why Qatar Can Leapfrog in AI-Powered Learning"
- Qatar University longitudinal study partnership on teacher time-savings

Event Activations

- Qatar Innovation Week: 6×4m interactive classroom booth
- Roadshow bus: 8 cities in 6 weeks with mobile lab
- Teacher AI Hackathon: 48-hour build-athon with winning module integration

Trust-Building Playbook – in Details

1 Majlis-style “Al Shura” sessions

Quarterly, invitation-only gatherings modelled on the majlis tradition: Scale execs, MoEHE, MCIT and Shura Council aides sit on carpets, share Qahwa, demo the latest roadmap and collect unfiltered feedback. Uses a culturally resonant consultation format and signals transparency.

2 Scale-MCIT Digital Teacher Residency

A 12-week paid secondment at the Qatar Digital Academy where 20 public-school teachers co-create Arabic lesson prompts with Scale engineers; graduates earn an AI certificate and become product advisors. Positions Scale investing in local talent and aligns with MCIT’s Digital Agenda 2030 up-skilling target.

3 PPP blueprint workshop & MoU

Two-day workshop with MoCI’s PPP Unit to map the Teacher Assistant rollout to Qatar’s 2020 PPP Law; ends with a co-signed blueprint and public MoU. It embeds Scale in the state’s preferred long-term procurement model and reassures finance officials about risk-sharing.

4 Five-year “Co-innovation Fund”

Scale commits QAR 5 m to co-fund R&D on Arabic STEM datasets, hosted at Qatar University; IP is co-owned, reinforcing joint stewardship. Converting the relationship from vendor→partner to underlining a multi-year horizon and local IP creation.

5 Teacher Time-Saved Guarantee

Offering a contractual clause: if the average teacher in year 1 saves < 4 hrs per week, Scale credits licence fees back. Showcases confidence and puts financial skin in the game and aligns incentives with MoEHE outcomes.

6 National AI Educator Awards

Annual gala during Qatar Innovation Week honouring the top 10 AI-empowered teachers; judged by MoEHE & MCIT, sponsored by Scale AI. The award celebrates local heroes, boosts advocacy, and anchors the partnership in national events.

7 Live Sovereignty Dashboard

Public webpage (Arabic/English) that streams uptime, latency and in-country data-centre location; approved by MCIT Cybersecurity. Addressing key ministry concern with radical transparency on data residency.

8 Joint Scale-Qatar University Internship Pipeline

10 CS undergrads per year rotate through Scale’s Doha office and California HQ (visa-permitting) on curriculum-alignment projects, building a talent bridge and signaling a decade-long presence.

9 Heritage-to-Future CSR Grant

Sponsor digitisation of historic Arabic manuscripts for the National Library, then use the texts to enrich AI language models. Scale AI blends cultural preservation with tech value, demonstrating respect for Qatari heritage.

Partnership & Community Ecosystem

MEEZA Alliance

On-premise deployment and SLA adherence through Qatar's leading managed-services provider.

Teacher Spotlights

90-second vertical videos on TikTok and Instagram Reels with English/Arabic subtitles.

Training Providers

EdEx Qatar and Udacity Arabia partnerships for CPD-accredited teacher courses.

AI Champions Network

2 teachers per pilot school with early access and monthly feedback calls.

WhatsApp Channel

Arabic-language quick tips, micro-surveys, and GIF demos for verified educators.
